Chat Program (Username/Password only)

Media Player

LibreOffice (Increases size of operating system and boot duration)

SSH Client

Terminal Emulator (Minicom serial port VT102 terminal emulator)

Xterm

Root-level Access (Text versions only)

Thunderbird (Encrypt and sign emails, Increases size of operating system and boot duration). Include OWA Web URL for Thunderbird below.

Additional Servers. Include Name and Protocol for Chat Server.

Name and Protocol for Additional Chat Servers:

OWA Web URL for Thunderbird:

Home Page. The default home page for the web browser is designed with one blank tab for you to customize and a second tab set to TENS Quick Help. Would you like a different home page (or no home page) to be set?

No, TENS home page only

Yes, add my organization's home page in place of the blank tab

If yes, specify the home page's URL:

Bookmarks. Please specify the names and URLs for any bookmarks you would like in the web browser. For each bookmark, include URL, its label, and whether it should be placed on the toolbar and/or menu.

Web Proxy. Does your organization require a web proxy when connected by VPN? If yes, please provide the proxy server address, port, and exception list below.

Address:

Port:

Exception List:

VPN Client. Does your organization require VPN client customizations?

Specify client version:

Hostname/IP Address/Web URL:

Label:

Miscellaneous configuration options:

Virtual Desktop Infrastructure. Does your organization require VDI client customizations?

Hostname/IP Address/Web URL:

Label:

Miscellaneous configuration options:

Please submit a configuration file if any specific settings are required.

Access to Remote Windows Shares. Authentication to Windows Server Shares using CAC/PIV uses Kerberos for authentication. In addition to the share locations, also provide the domain and one or more key distribution servers below.

Kerberos Domain:
[AKA Active Directory domain]

Key Distribution Centers (KDCs):
[AKA Windows Domain Controller]

Windows Shares (Names and URLs):

Firewall Configuration. The default firewall configuration allows all outgoing connections and drops all incoming connections. If you have any additional firewall requirements, or would like to have no firewall at all, please specify below.

No, default settings are desired

Yes, my organization has additional firewall requirements

If yes, specify the requirements:

Desktop Wallpaper. The default desktop wallpaper is the TENS logo. You may either use the default, provide a custom wallpaper, or specify a custom wallpaper. If submitting a wallpaper, please submit as 1280 x 768 SVG, PNG, or JPG. If providing a logo for us to create a wallpaper for you, please provide in scalable format (SVG) or raster format with transparent background (PNG).

The default TENS background is desired

I would like to provide a custom wallpaper (provided as an attachment)

I would like to specify a custom wallpaper (logo provided as an attachment)

If any customizations are required, include notes on the customization, if required:

Time Zone. Please specify your users' time zone (only one allowed).

Hawaii-Aleutian (Honolulu)

Alaska (Anchorage)

Pacific (Los Angeles)

Mountain (Denver)

Central (Chicago)

Eastern (New York City)

Other

If other, specify which time zone:

Miscellaneous. If there are other customizations, questions, or notes, specify them here.

Point of Contact. Please specify the best POC and his/her contact information. This person will be contacted directly by TENS personnel to answer any remaining questions regarding the customized OS build. Additionally, this person will be responsible for accepting the custom OS from a secure website, safeguarding the operating system on behalf of your organization, and distributing the OS to your organization.
